[C Program To Add Two Numbers Integers Using Pointers](#)

The image shows a screenshot of a C++ IDE window titled "NONAME00.CPP". The menu bar includes "File", "Edit", "Search", "Run", "Compile", "Debug", "Project", "Options", "Window", and "Help". The code in the editor is as follows:

```
// C++ program to add two numbers using pointers
#include<iostream.h>
#include<conio.h>
void main()
{
    clrscr();
    int num1, num2, *ptr1, *ptr2, sum=0;
    cout<<"Enter the two number: ";
    cin>>num1>>num2;
    ptr1 = &num1;
    ptr2 = &num2;
    sum = *ptr1 + *ptr2;
    cout<<"Sum of the two number is "<<_
```

The status bar at the bottom shows the time "13:44" and function key shortcuts: "F1 Help", "F2 Save", "F3 Open", "Alt-F9 Compile", "F9 Make", and "F10 Menu".

& operator returns 'address of' a given value. Below is a program adding two numbers using pointers. #include int main ... Simple Program for Add Two Numbers Using Pointer in C\*/ /\* Print Pointer Address Program,C Pointer Examples \*/ #include int main() { int \*p1, \*p2; int .... C Program To Add Two Numbers Using Addition Operator. #include #include void main() { int a,b,add; clrscr(); .... Program to add two numbers using pointers in C++. . #include using namespace .... C program to add two numbers using pointers. int main() { int first, second, \*p, \*q, sum; printf("Enter two integers to add\n"); scanf("%d%d", &first, &second); p = &first; q = &second; sum = \*p + \*q; printf("Sum of the numbers = %d\n", sum); return 0; }. Learn to add two numbers using pointers in C++ programming language. ... Here, we'll write a program to print the sum of two numbers using a pointer in C++. ... #include using namespace std; int main() { int num1, num2; int \*ptr1,\* .... [code]int add(int\* a,int\* b){ return \*a + \*b; } void main( ){ int a=10,b=5,c; c=add(&a,&b); //c=10+5=15 }[/code] //This is popularly known as Pass/Call By Reference.. C program to find the product of two numbers using pointer ... mul=\*ptr1 \* \*ptr2; //10; printf("Product of the two integer values is: %d" ... Create two variables to store two numbers as input (num1 and num2) provided by the user.. To add two numbers using pointer in c programming, you have to ask to the user to ... clrscr(); int num1, num2, \*ptr1, \*ptr2, sum=0; printf("Enter the two number .... To add two numbers using pointer in C++ Programming, you have to ask to the ... clrscr(); int num1, num2, \*ptr1, \*ptr2, sum=0; cout<< p= &f;; q=&s;; sum= \*p + \*q; .... This C program lets the user enter two integer values. Then we are going to add those two numbers using the concept of the pointer. Later we will assign the total .... C program to add two numbers using pointer variable ... sum=\*ptr1+\*ptr2; //10; printf("Sum of the two integer values is: %d",sum); //11; getch(); ... f559db6386
